Note: - Rate of the products Mention in the Website will be verified by day to day fluctuation in the Indian Agro Market Actual Rate of the Products will be provide at the time of final Confirmation of Order

For Butter, Oil or Grease

Wipe excess butter, oil or grease off the leather with a clean, dry cloth, then leave it alone as the spot should dissipate into the leather in a short period of time. Do not apply water to try to wash a butter, oil or grease spot.

Do Not Use

Saddle soaps, oils, abrasive cleaners, soaps, furniture polish, oils, varnish or ammonia water. The leather has already been permanently preserved in the tanning process and needs no maintenance other than the simple cleaning recommended. Most liquids will be initially repelled by the leather, but, if left to stand over an extended period of time, they will be absorbed. That is why it is a good idea to mop up spills immediately. But even if the spill is absorbed, it will dissipate in time, just as human skin will absorb and eventually diffuse stains.

created from quality Leather
