

WHITE SUGAR

We supply 100% pure and unadulterated sugar, which is procured from most renowned sugar mills of India. It is ensured that the sugar does not contain any unnecessary chemicals and impurities. Besides, we also offer different types of sugar such as low calorie, powder etc.

White Sugar

Grade : S-30
Icumsa : 100 Max
Polarisation : 99.8
Degree Min Moisture : 0.06% to 0.08% Max.
Ash : 0.1% Max
Solubility : 100.0% Dry and Free Flowing
Color : Sparking White
Radiation : Nil
Smell : Free of any Odour
Season of Production : 2008
Packing : 50 Kgs.PP Bags (26mt in one 20'FCL)

Detailed Product Description

White Cane Sugar ICUMSA 45:

Refined White Cane Sugar CUSA 45

1. POLARIZATION 99.8%
2. MOISTURE 0.04% MAX
3. ASH BY ELECTRICAL CONDUCTIVITY 0.04%MAX
4. ICUMSA 45 RBU
5. SULPHUR IN DIOXIDE 20 MG/KG MIN
6. WATER INSOLUBLE MATTER 0.012% MAX
7. SOLUBILITY 100% FREE FLOWING
8. RADIATION NORMAL
9. SUHG SOLID CRYSTAL
10. GRANULATION FINE TO MEDIUM
11. LATEST CROP
12. RADIATION NORMAL W/O PRESENCE OF CESIUM/IODINE CERTIFIED
13. COLOUR WHITE MAXIMUM 45 ICUMSA ATTENUATION INDEX UNIT (ICUMSA METHOD No. 4-1978)
14. SEDIMENT NONE
15. SMELL FREE OF ANY ODOUR
16. REDUCING SUGAR 0.50% MAXIMUM BY WEIGHT
17. So₂ 70MG/KG MAXIMUM

Note: - Rate of the products Mention in the Website will be verified by day to day fluctuation in the Indian Agro Market Actual Rate of the Products will be provide at the time of final Confirmation of Order

WHITE SUGARS RANGE

PREMIUM WHITE SUGAR (previously called Bottlers, Canners or Low Colour) is manufactured white sugar which meets the standards set by the National Soft Drink Association of the USA and National Canners Association of the USA, and also meets the standard set by the US National Food Processors Association. It is produced for specific uses where purity is most important. It is especially suitable for use in bottling of aerated waters, in canning of low-acid foods where sugar with low levels of particular types of spoilage micro-organisms in the can is needed, or where the product is sensitive to colour introduced with the sugar.

Regular" sugar, as it is known to consumers, is the sugar found in every home's sugar bowl and most commonly used in home food preparation. It is the white sugar called for in most cookbook recipes. The food processing industry describes "regular" sugar as extra fine or fine sugar. It is the sugar most used by food processors because of its fine crystals that are ideal for bulk handling and are not susceptible to caking.

What nutritional impact does refined white sugar have on my diet? Refined white sugar is pure sucrose, a carbohydrate. Carbohydrates provide energy, contain no fat, and like protein contribute 4 calories per gram in your diet (as opposed to the 9 calories per gram contributed by fat).

Your body treats sucrose in the same way regardless of its source. In fact, your body uses all sugars in the same way, so eating refined sugar, or honey, or sugars from any other source has the same effect on your body -- it is converted into glucose and used by the cells for energy.
